RICHARD P. MONTOYA
CHAIRMAN
EILEEN G. CLIFFORD
COMMISSIONER
PHIL R. LUCERO
COMMISSIONER

BRUCE KING
GOVERNOR

To the Honorable Bruce King
Governor, State of New Mexico

Dear Governor King:

In compliance with the requirements of Section 15 of Article III of the New Mexico Public Utility Act, we transmit herewith the thirty-sixth Annual Report of the New Mexico Public Service Commission for your information and consideration.

This report includes the acts and proceedings of the Commission and statutes relating to the reports, and statements made to it by the public utilities subject to the provisions of the Public Utility Act.

Respectfully submitted,

Richard P. Montoya, Chairman
Eileen G. Clifford, Commissioner
Phil R. Lucero, Commissioner

October 31, 1980

INTRODUCTION

There were no changes in the membership of the Commission during the fiscal year covered by this report.

During the fiscal year covered by this report, the Commission adopted and promulgated General Order No. 34, being rules governing residential customer services by gas, electric, and rural electric cooperatives; General Order No. 33, being rules governing energy conservation programs by electric and gas utilities; established an open meeting policy in compliance with legal requirements, and; developed policies of delegation of authority to hearing officers and to the Executive Director. The Commission also began the consideration of new or modified general orders associated with fuel and gas adjustment clauses and also began the development of policy regarding the matter of lifeline rates.

The Commission is continuing its efforts to achieve compliance with the National Energy Act, a group of five laws that became effective on November 9, 1978. The five acts include the Public Utility Regulatory Policy Act (PURPA), the Natural Gas Policy Act (NGPA), the National Energy Conservation Policy Act (NECPA), the Fuel Use Act (FUA), and the Energy Tax Act (ETA). Those acts imposed eleven regulatory ratemaking standards for consideration by state utility commissions and include many other performance requirements of such commissions. The workload impacts on the Commission as a result of the National Energy Act are just beginning to hit hard.

The issues the Commission has to deal with in current cases are much more technically demanding and time consuming than they were in the past. The Commission must hear, and the Staff must prepare for and deal with arguments that the historical test year approach doesn't work because of inflation; that return on the equity component of a utility's capital structure is critical rather than return on total investment; discussions by various experts on what the actual return on equity must be for the utility to be able to attract capital; presentations on declining interest coverage on bonded debt; utility cash flow considerations and problems; the utility's capital market relationships; load forecasting; expansion needs and problems; energy conservation; rate reform; social considerations; etc. The recent increases in utility rates and the concern expressed by everyone affected thereby has caused the Commission to initiate more workload on its own for investigations, rule makings and generic proceedings. This effort on the part of the Commission will have to increase if it is to be responsive to the problems of New Mexico and if it is going to be able to become more efficient in meeting its obligations now and for the future.

The Commission is appreciative of the support being given by the Executive and the Legislature in recognition of the problems being experienced in the regulation of public utilities. The current budget appropriation allowed us more staff and the development of the application of electronic data processing and microfilm technology. The Commission is responding as rapidly as possible while maintaining the policy of not filling vacant positions until

it is assured that the best qualified available personnel have been obtained to fill them. The PSC also responded to the recommendations of last year's Legislative Agency (Sunset) Review Committee regarding hearing officers, specialized staff and policy towards out-of-state utilities with few customers in New Mexico (and vice versa).

The Commission and Staff is continuing to work with its Management Consultant in implementation of the consultant's recommendations. The Executive and applicable Executive agencies are also working cooperatively with the PSC and its Management Consultant in the improvement of the utility regulatory function. The Personnel Board has been helpful in assisting with the development of appropriate job descriptions and required qualifications to meet the PSC's organicational and functional needs as well as with recruiting for specific needs.

The Commission has hired a very well qualified Hearing Officer and a Deputy Director. These personnel have brought to the Commission not only academic preparation, but years of specific and applicable experience. It is the PSC's intent to ultimately reduce its dependence on expensive technical consultants by hiring such appropriately experienced personnel combined with young people from our universities whose academic preparation is proper to allow for their rapid professional development under the tutelage of such experienced people. Implementation of the recommendations of the PSC's Management Consultant will create an organization, appropriate position descriptions, required qualifications and a salary structure that will demand professional growth through challenge coupled with

reasonable compensation.

Some of the more critical issues that are presently before the Commission include lifeline rates, the needs of our electric utilities for large amounts of new capital to fund expanded generating and transmission capacity, expanded activities at the federal regulatory level in order to protect New Mexico's interests, review and consideration of fuel and gas adjustment clauses, and the matter of conservation of resources as it relates to utility regulatory matters.

In the matter of lifeline rates the Commission is responding to House Memorial No. 53 from the New Mexico 1979 Legislative Session and to the requirements of the Federal Public Utility Regulatory Policy Act. Our study of lifeline rates has been completed and was submitted to the Legislature last winter. The Commission initiated an administrative rule making proceeding in May of this year to consider lifeline rates.

The needs of our electric utilities for large amounts of new capital for expanded capacity to produce and transmit electricity do, and will have, probably the greatest impact on electric utility rates of any aspect of utility activity or expense. Billions of dollars of new capital will be required by the 1990's. A case has been initiated by the Commission which is designed to provide information and understanding of this complex and critical matter on a company by company basis with the ability also to synthesize the material on a state-wide basis. Economic conditions in New Mexico and in the nation are changing significantly and the Public Service Commission must be able to respond to their regulatory obligations

and to take the necessary initiatives in order to protect the interests and rights of New Mexico.

The PSC is also expanding its activities involving the Federal Energy Regulatory Commission which controls interstate and wholesale utility rates. Unless we maintain an effective involvement with proceedings before the Federal Energy Regulatory Commission, preemption of desired state control over associated resources and retail pricing can result. State regulatory commissions do have rights under federal law to protect their interests, however, if they are not effectively exercised they may be lost.

The Commission also has an ongoing proceeding to deal with the review and consideration of fuel and gas adjustment clauses. Its purpose is to thoroughly investigate and analyze the problem, to thoroughly investigate potential approaches to solution of the problem, and to assure adequate ongoing regulatory scrutiny and supervision. The matter of conservation of resources as it applies in the regulation of utilities has become an ongoing concern of the Commission. The PSC has tried to concentrate the majority of its policy considerations associated with conservation in its General Order No. 33 for the sake of efficiency. That general order addresses the Commission's concerns as well as the mandate of the Federal Public Utility Regulatory Policies Act and the National Energy Conservation Policy Act. Such matters include innovative rate structures and costing methodologies as well as interface with the New Mexico Department of Energy and Minerals associated with residential conservation service activities.

The Commission is also taking advantage of federal grants

available to it as a result of the National Energy Act. The Commission has used available grant money to try to improve its operation. Our study of lifeline rates was mostly federally funded as was, and is, our management study. We are also using federal funds to help administer our General Order No. 33, to help us break into electronic data processing in the most efficient manner, and to provide the Commission with advice on how to comply with certain requirements of the Public Utility Regulatory Policy Act associated with public access to rate case information. The PSC is also using federal funds for a detailed study of utility rate structures as they impact on the development of solar technology. That study is intended to provide the Commission with policy advice on utility rate structures that will not discriminate for or against solar development.

In summary, the New Mexico Public Service Commission is doing everything within its power and resources to meet its many obligations under the New Mexico Public Utility Act and the Federal National Energy Act.

STATUTORY DUTIES AND AUTHORITY

The New Mexico Public Service Commission is charged by the Public Utility Act with the regulation of the rates and service provided by gas, electric and water utilities. The Public Utility Act became law in New Mexico in 1941. The Act created a three-person commission appointed by the Governor, with the approval of the Senate, for staggered six year terms.

Municipally owned electric and gas utilities are excepted from Public Service Commission jurisdiction under the Act unless the voters of a municipality vote for regulation. To date, no such vote has been taken. Any exception to this exception is an electric municipal utility operating more than five miles beyond the municipal boundary. Rural electric cooperatives were excepted from Commission regulation until 1961 when they were made jurisdictional by law. In 1966 that law was found unconstitutional. In 1967 new law re-established jurisdiction.

A Commission final order is subject to review by the District Court on petition by any party to the Commission proceeding alleging that the order is unreasonable, or unlawful or both. The burden of proof is on the appealing party. An appeal from the District Court may be taken to the State Supreme Court by the party who appealed or by the Commission if it is overruled.

A public utility must have prior approval of the Commission for the issuance of stocks and the issuance of long term securities. No person may operate as a utility without obtaining from the Commission a Certificate of Public Convenience and Necessity which is, in effect, a license to do business which only the Commission may issue. This certificate is also required for certain extensions of service territory and certain additions of plant and facilities. Since 1971 the Commission must approve the location of large electric generating stations and transmission lines from an environmental standpoint.

An amendment was passed in 1980 giving the Commission certain limited authority to examine the books and records of business entities that are affiliates of public utility companies.

ORDERS ISSUED WITHOUT HEARING

The following Orders were issued without hearing by the Commission during the past fiscal year.

Order No. 394 -- Order

On July 23, 1979, the Commission issued its Order No. 394 pursuant to House Memorial No. 53 of the 1979 New Mexico Legislature and Section 114 of the Public Utility Regulatory Policy Act of 1978, commending a lifeline rate study and investigation to determine the feasibility and impact upon New Mexico ratepayers and utilities of implementing lifeline rates.

The Commission contracted the firm of Larry Adcock and Associates to collect data from Gas Company of New Mexico; Public Service Company of New Mexico; Hobbs Gas Company and Northern Rio Arriba Electric Cooperative essential to carry out its duties to assess lifeline rates, finding that the above utilities were representative utilities for the purpose of conducting a lifeline study.

Order No. 395 -- Gas Company of New Mexico -- Order

On December 7, 1979, Gas Company of New Mexico filed its Advice Notice No. 345 and Sheet No. 1267, "Schedule No. 56--Industrial Service Affected by Incremental Pricing," cancelling revised NMPSC Sheet 1265, effective January 1, 1980, pursuant to the provisions of Title II of the Natural Gas Policy Act of 1978 and the Rules and Regulations adopted by the Federal Energy Regulatory Commission.

On December 31, 1979, the Commission issued its Order approving Revised NMPSC Sheet No. 1267 requiring Gas Company to file (1) the names of all industrial customers affected by the incremental pricing provisions of the NGPA of 1978; (2) a plan for the distribution to unaffected customers of the incremental pricing revenues collected, and (3) the filing, testimony and exhibits to be mailed to its industrial customers to be affected by Rate Schedule No. 56.

Order No. 397 - Public Service Company of New Mexico-- Order Approving Tariff Schedule Filings

On March 21, 1980, Public Service Company of New Mexico filed its Advice Notice No. 58 and Revised NMPSC Sheet No. 268, "Table of Contents,".. Revised NMPSC Sheet No. 269, "Special Charges--Water Department" (re-titled "Rule 26, Special Charges--Water Department") cancelling NMPSC Sheet No. 250. PNM requested that the Commission waiver any requirements dealing with the 30 day requirement or formal hearing.

On April 7, 1980, the Commission issued its Order Approving Tariff Schedule Filing, after good cause shown, approving Revised NMPSC Sheets 368 and 269 effective on and after April 17, 1980.

Order No. 398--Community Public Service Commission--Order Approving Tariff Schedule Filing

On March 27, 1980, Community Public Service Company filed Advice Notice No. 43 and Revised NMPSC Sheet No. 407, "Table of Contents" and Original NMPSC Sheet No. 408, "Schedule CEPS--Contingency Economy Power Service" applicable to the industrial copper accounts in Grant County, New Mexico.

On April 7, 1980, the Commission found that good cause existed and approved Sheets 407 and 408 to become effective on and after April 7, 1980 the date it issued its Order Approving Tariff Schedule Filing.

RATE ADJUSTMENTS

Cases Filed, Hearings held and Decisions Rendered during Fiscal Year ended, June 30, 1980

LITIGATION IN COURT

During the fiscal year, the Commission was party to proceedings in both the District Court and Supreme Court of New Mexico. A brief resume of each case follows:

Hobbs Gas Company v. New Mexico Public Service Commission, New Mexico Supreme Court Nos. 12,147; 12,167; 12,075; 12,076, Lea County No. CV-78-245, Commission Case No. 1359.

This matter was pending at the end of the previous fiscal year and was reported in our prior Annual Report.

Previously, Hobbs Gas Company had filed with the New Mexico Public Service Commission several Advice Notices and Tariff Sheets by which it requested the Commission to approve a rate increase. After hearing, the Commission issued its Final Order denying any rate increase. Hobbs appealed to the District Court which held that the Commission's Order was arbitrary, capricious, unreasonable, unlawful and not supported by substantial evidence. The District Court declared the Commission's Order invalid and remanded the cause. From this Order, the Commission appealed to the New Mexico Supreme Court.

On January 17, 1980, Justice Payne affirmed the judgment and Order by the District Court, joined by Justice Easley and Justice Felter. Briefly, the opinion of the Supreme Court held: (1) that the District Court did not err in vacating and annuling the Order of the Commission, which directed that Hobbs acquisition adjustment should not be included within its capital structure for the purpose of rate base and revenue requirements, and (2) that the District Court did not err in applying the doctrines of res judicata and equitable estoppel to the proceedings, and (3) that the Commission did err in not allowing Hobbs the right to present a rebuttal witness on the issue of acquisition adjustment.

Gas Company of New Mexico v. New Mexico Public Service Commission and Faye Weeaks, Eddy County No. CV-79-341, Commission Case No. 1467.

On August 13, 1979, the New Mexico Public Service Commission issued its Findings of Fact, Conclusions of Law and Order, finding that Gas Company of New Mexico has violated General Order 32, and fined the said company $500.00 for violating the Public Utility Act and General Order 32.

On September 20, 1979, Gas Company of New Mexico filed a Petition for Review of the Final Order of the Commission, in the District Court for the County of Eddy.

On October 5, 1979, the Commission filed its Answer to the Petition for Review.

On October 31, 1979, the Commission filed a Motion and Brief for a Change of Venue.

On January 22, 1980, a Hearing on the Motion for Change of Venue was held, and the same was denied by the District Court.

On May 1, 1980, a request for admissions was submitted to the Gas Company of New Mexico by the Commission, and Gas Company of New Mexico filed objections to the requests for Admissions.

On August 18, 1980, an Order was entered by the District Court sustaining objections to the requests for Admissions.

A trial date has been set for November 18, 1980 in the Eddy County District Court.

Mora-San Miguel Electric Cooperative, Inc. v. Robert L. Williams d/b/a New Mexico Mill and Lumber Company, New Mexico Supreme Court No. 12,572, Commission Case No. 1158, San Miguel County,

On March 24, 1977, the New Mexico Mill and Lumber Company filed a Petition for Review with the Supreme Court of New Mexico seeking a review of a decision entered by the District Court of San Miguel County on February 16, 1977. The District Court upheld a decision of the New Mexico Public Service Commission which affected the rates paid by the New Mexico Mill and Lumber Company to Mora-San Miguel Electric Cooperative, Inc., under an existing contract.

In his Petition for Review to the New Mexico Supreme Court, Williams originally concluded that the Commission did not have the authority to modify the terms of the contract in its ratemaking powers, that he then had with the Mora-San Miguel Electric Cooperative, Inc.

Later, the case was remanded back to the District Court, due to the failure to join the New Mexico Public Service Commission as an indespensible party. At that time, Williams argued that he did not oppose the power or the authority of the Commission to modify or abrogate the terms of a contract between a public utility and its customer. He did allege, however, that he did not receive proper notice, and that his constitutional rights of due process were not protected. He further alleged that substantial evidence did not support the Commission's decision with respect to Williams.

At the second hearing before the District Court of San Miguel County, the Court affirmed its prior decision and holding for Mora against Williams on April 19, 1979. Williams then appealed the decision of the District Court to the Supreme Court of New Mexico for a second time on March 24, 1977.

This matter was still pending at the end of the fiscal year.

Gas Company of New Mexico v. New Mexico Public Service Commission, Santa Fe County No. 79-645, Commission Case No. 1440.

This matter was reported in detail in our last fiscal year

Annual Report, and remained pending at the end of the present fiscal year.

State of New Mexico ex. rel. New Mexico Public Service Commission v. Conchas Water Company and Darrell E. Adams, Santa Fe County No. 78-2432(Misc.)

This matter was reported in our last fiscal Annual Report. Since that time, the Conchas Water Company and Darrell E. Adams, applied to the Commission for an Abandonment of its Certificate. Thereafter, the water-users formed a non-profit cooperative association known as Big Mesa Water Cooperative, organized for the purpose of carrying on the provision of water service to the customers of the former regulated utility. The Cooperative is a non-jurisdictional operation. The Commission closed its file on the Conchas Water Company and Darrell E. Adams, with the filing of the Certificate of Abandonment.

Lea County Electric Cooperative, Inc. and N-Ren Southwest, Inc. v. New Mexico Public Service Commission, Santa Fe County No. SF-77-1971, Commission Case No. 1301.

On November 9, 1977, Lea County Electric Cooperative, Inc. and N-Ren Southwest, Inc. filed a Petition for Review in the Santa Fe District Court, regarding the Commission's decision in Case No. 1301, "In The Matter of the Application of Gas Company of New Mexico for an Amendment to its Rate Schedules as to Provide for Cost of Service Indexing."

On December 5, 1977, Gas Company of New Mexico filed a Petition for Leave to Intervene as Respondent.

On December 13, 1977, the Attorney General filed a Petition for Leave to Intervene.

On December 13, 1977, the Commission filed its Answer to the Petition for Review.

On December 15, 1977, the Certification of Record was filed with the District Court.

On December 27, 1977, a Motion on behalf of the New Mexico Public Service Commission, requesting that Gas Company of New Mexico be permitted to intervene.

On January 12, 1978, a response was filed on behalf of the Energy Resource Board of the State of New Mexico, to the Petition for Review.

On January 31, 1979, a Motion was filed on behalf of Ideal Basic Industries, Inc., for Leave to Intervene.

At the close of the fiscal year, this matter remained pending.

El Paso Electric Company v. New Mexico Public Service Commission,

Santa Fe County No. 79-1333, Commission Case No. 1454, Phase I.

This matter was an Appeal from the Commission's Phase I Order on Revenue Requirements in the Company's 1978 Rate Case, New Mexico Public Service Commission Case No. 1454. At issue in the Appeal were the Commission's denial of construction work in progress (CWIP), its treatment of plant-held for future use and other items which the Company alleged resulted in confiscatory rates.

The Request for Review filed by El Paso Electric Company was settled among the Company, the Office of the Attorney General and the New Mexico Public Service Commission in April of 1980, in connection with a Stipulation made among the Company and all parties to the ongoing Rate-Proceeding before the New Mexico Public Service Commission on the Company's 1979 rate increase application, in New Mexico Public Service Commission Case No. 1539.

Gas Company of New Mexico v. New Mexico Public Service Commission, Santa Fe County No. SF-80-761(c), Commission Case No. 1499.

The Gas Company of New Mexico filed a Petition for Review in the Santa Fe District Court on April 21, 1980 seeking a review of the final Order of the Commission in Case No. 1499. Case No. 1499 was a general rate case in which the Company sought authority to increase its rates in order to have an opportunity to recover its costs of providing utility service, including a fair return on its capital invested in providing that service. The principal issue in the Company's request was the issue of an attrition allowance.

This case was pending at the close of the fiscal year.

PROCEEDINGS BEFORE THE FEDERAL ENERGY REGULATORY COMMISSION

Public Service Company of New Mexico, Docket No. ER80-376, 12 FERC ¶61019. The Commission has intervened in this proceeding before the Federal Energy Regulatory Commission (FERC) in which PNM is requesting FERC's approval of a firm surplus energy agreement between PNM and the City of Los Angeles, Department of Water and Power, for the sale of 700,000 Mwh from PNM to Los Angeles during the period January 17, 1980 through April 30, 1982. FERC has accepted the agreement for filing as an initial rate under §206 of the Federal Power Act becasue of a finding that the demand charge aspect of the contract rate may be unjust.

Public Service Company of New Mexico, Docket No. ER80-235, 12 FERC ¶(_____). The Commission has intervened in this case before FERC in which PNM has requested approval of rate contained in a contingent capacity sales agreement between PNM and San Diego Gas & Electric Company involving the sale to San Diego of 236 Megawatts of contingent capacity from PNM's San Juan Unit 4 from May 1, 1982 to April 30, 1988. The Commission supplemented its initial notice of intervention with an expanded statement of its position expressing among other things the concern that FERC approval would prejudice the ability of the Commission to protect the interest of New Mexico ratepayers. Basing its opinion partly on the concern expressed by the Commission and the fact that PNM's filing was based largely on estimated data, the FERC deferred all action on the application until updated data could be provided giving our Commission the opportunity in the interim to conduct such inquiries and investigations as it considers necessary. A special concurring opinion by FERC Commissioner Matthew Holden, Jr. expressed concern over the possibility of unintentional abrogation of New Mexico's exercise of its certificate jurisidiction.
